

14-06-2025

## Agenda:

pandas - III

unit intro

- installation
- github
- UI / CLI
- practical

Numerical Data → 1 : int      1.01 : float

String → "Hello"

Boolean → True or False      |      0 or 1

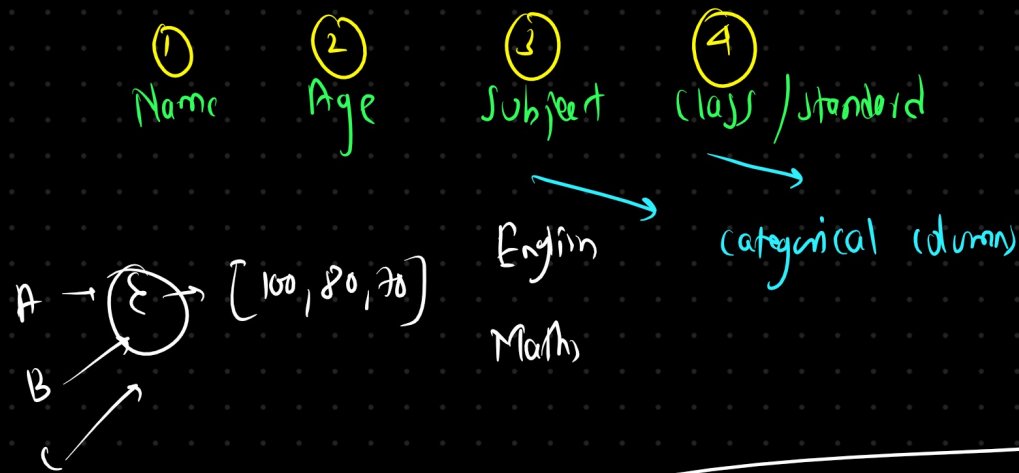

Categorical Data : —

→ groups

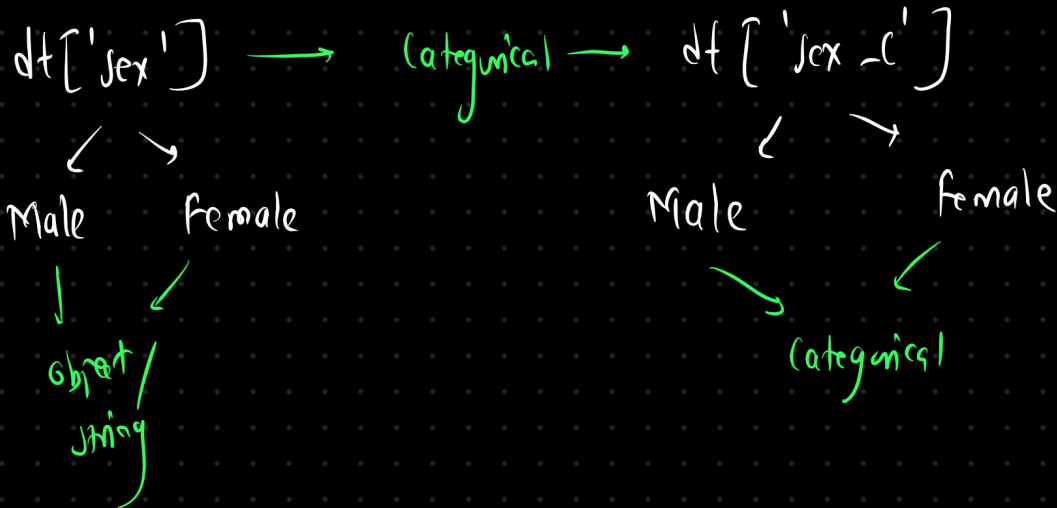

→ discrete categories

category		category
A →	1	Team A
B →	1	Team A
C →	2	Team B
D →	2	Team B

1 → 100

obj → categorical

male  
female

→ unique →

male  
female

Alpha  
sort

$\begin{bmatrix} \text{female} & \text{male} \\ 0 & 1 \end{bmatrix}$

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

$df[ ] = df['Sex\_C'].cat.codes$   
↑

- ... 1200 - ...

tyu

adf

wer

① 'tyu' > 'adf' → string [p-class]

② 3 > 1 → numerical

'tyu' > 'adf' > 'wer' → ? →

# Git

14-06-2025

Todo.v1

→ 18-06-2025

update (added more functionalities)

Todo.v2

↑ chatgpt

→ checking → error

v1 → last  
v2 → error

v3

v4

v5

v6

⋮

v1000

facebook → day-1

changes

day N

→ developer friendly

versioning tool

Todo

A  
util.py?

Todo

B  
a.py?

write code → Editor

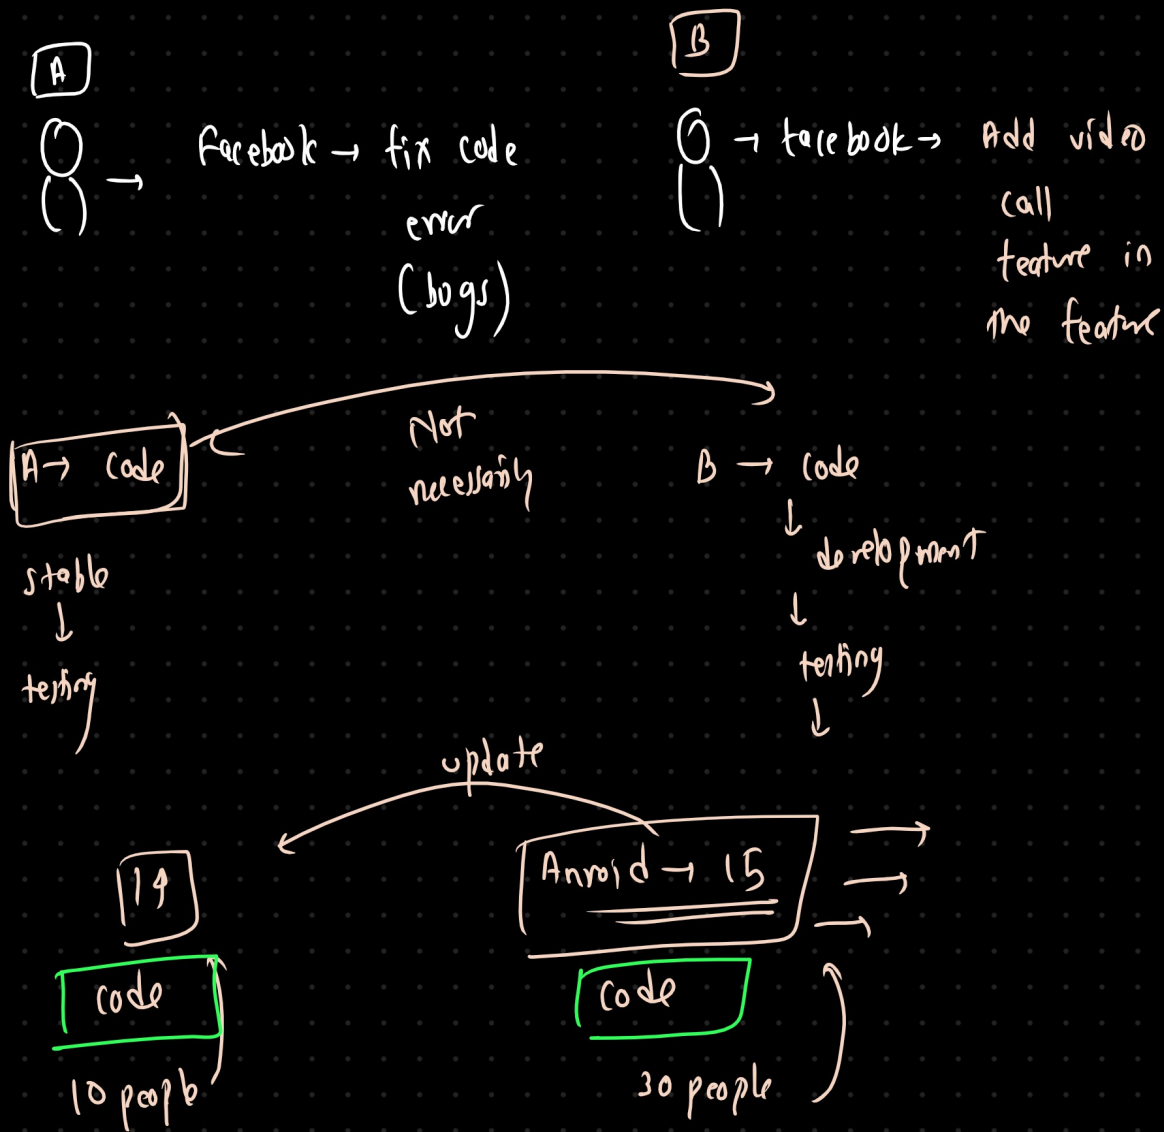

run code → IDE

programming →

libraries →

issue → track changes

- \* Versioning tool
- \* Track code changes

project - Android

- \* separate code

- \* Versioning tool
- \* Track code changes
- \* separate code by functionality (branch)

git

## github

- stores git repositories online
- share code online (public or private)
- pull request, branches

git → version

→ collaborate with others

→ revert back changes

git commit -m "merge"
